

LE DUY KHANG

Fullstack Developer

0949057557 | contact.ldkhang@gmail.com | Ho Chi Minh City |  kane06092004 |  LDKhangg

SUMMARY

Junior Fullstack Developer with hands-on experience building web applications using Java/Spring Boot and React. Strong foundation in OOP, Data Structures, SQL, and RESTful APIs, with practical experience using PostgreSQL, Docker, and Git. Currently learning Go and eager to grow through building real-world products.

EXPERIENCE

WALA-ICT

Fullstack Software Developer

Jun. 2025 – Jun. 2026

Ho Chi Minh City, Viet Nam

- Contributed to fullstack development across ERP and multi-tenant business systems, building frontend features with React and backend services with Java/Spring Boot.
- Worked closely with Business Analysts and developers in a Scrum team to clarify requirements, implement features, integrate APIs, and support testing and releases.

AWS First Cloud Journey

Cloud Training Program

Sep. 2025 – Nov. 2025

Ho Chi Minh City, Viet Nam

- Completed hands-on labs and deployed web applications on AWS (EC2, S3, RDS, IAM), gaining foundational cloud architecture knowledge transferable to GCP environments.

PROJECTS

B2B Construction E-Procurement Platform – WALA-ICT

Jan. 2026 – Jun. 2026

- Developed backend modules for multi-tenant cloud service management, including cloud projects, tenant-specific configurations, and related business workflows.
- Implemented a SystemCode module to centrally manage reusable codes such as types, categories, and statuses, reducing hard-coded enum values across the application.

Tech Stack: Java 21, Spring Boot, MyBatis, PostgreSQL, Redis, Flyway, S3/MinIO, Docker

Fitness Franchise Management SaaS – WALA-ICT

Jun. 2025 – Jan. 2026

- Developed ERP frontend features for managing operations across multiple fitness centers using React and TypeScript.
- Integrated frontend workflows with backend REST APIs for center administration, member management, scheduling, and reservations.
- Implemented QueryDSL-based queries for admin dashboards, supporting reporting and analysis of revenue, attendance, and member activity.

Tech Stack: React, JavaScript, TypeScript (Basic), Java 17, Spring Boot, Spring Data JPA, QueryDSL, MySQL

Graduation & Startup Project: Smart Laundry Locker (IoT)

Feb. 2026 – May 2026

- Secured a 50,000,000 VND startup grant from FPT University to develop an IoT-based smart laundry locker system as both a Graduation and Startup project.
- Built and containerized the Spring Boot backend with PostgreSQL and Redis, integrating MQTT for real-time communication and remote locker access control.

Tech Stack: Java, Spring Boot, MQTT, PostgreSQL, Redis, Docker

TECHNICAL SKILLS

Languages: Java, Go (Learning), JavaScript, TypeScript (Basic)

Frontend: React, HTML, CSS

Backend: Spring Boot, Spring Security, Spring Data JPA, MyBatis, QueryDSL

Data & Cloud: PostgreSQL, MySQL, Redis, AWS (Basic), Digital Ocean (Droplet)

Tools: Docker, Git, Cursor, Claude, Codex

EDUCATION

FPT University

2022 – 2026

Bachelor of Software Engineering

Ho Chi Minh City, Viet Nam

- English: CEFR B2, able to read technical documentation and communicate effectively in a professional working environment.
